

SPEECH FOR DELEGATES FROM HOLLAND

Firstly allow me to recognize the presence of :

Bo Nelke

Bo Mariahne

Bo Jelske

Bo Drieke Holl

Our coordinate Mr Mike Mutti

Zambridge Board Senanga.

P.T.A committee .

The contractor Mr Lubinda Kanyanyu

Parents

Pupils

Let me say ladies and Gentlemen you are welcome to Maxanaaedi community school , Senanga.

I wish to take this opportunity to thank you Bo Nelke and the group for your love, care and support you continuously render to this school . Your support has brought about a great long going change in attaining quality education among our orphans and vulnerable children.

NEW PROJECTS

Thank you very much for the staff house funding. Let me inform you that your funding has been managed accordingly by all stakeholders more especially our coordinator Mr Mike Mutti such that the staff house has reached completion and ready for occupation just awaiting your authority .

I will not stop saying thank you for you have never stopped supporting us. Thank you again for understanding our request and funding of the 1 X 3 classroom Block. The 1x 3 classroom block is under construction and is at wall plate level . I assure you on behalf of the community that we will work together with our contractor to reach completion of the 1 x 3 classroom Block before schools open on the 12th of May 2014.

LUITUMEZI very much for continually feeding our Orphans and vulnerable children .This has maintained our pupil's health and always active both in class and out class activities.

APPRECIATIONS

Let me also report to you that the Government is very happy with what you are doing here at Maxanaedi school . In support it has increased the number of teachers from the previous 6 to 10 trained teachers, provided more desks due to high increased enrollment and has allowed the processing of grade 7 and 9 examination centre numbers through the DEBS office.

I thank you, because your commitment to this school has incandled a spirit of working together among our community members .Through donations and hammer mill fundraising the community has managed

the electricity wiring of this 1 x 3 CRB as first stage in solving the challenge of lack of electricity in the school.

CHALLENGES

Let me also bring to your attention that the school enrollment has increased from 360 pupils to 512 pupils ; 336 boys and 276 girls . This has made it difficult to manage the use of shifting latrines . The situation has become health hazardous . I humbly request you to help the school with VIP toilets for hygiene.

Thanks very much indeed for the beautiful Headteacher house. Also be informed that 9 others teachers still lack accommodation and continue squatting in various distant compounds . Please carry with you and remember in your meetings our humble request for more teachers accommodation .

In short let me say , Maxanaedi still calls for more infrastructural support as earlier alluded that we are processing the grade 7 and 9 examination centre number ; that is we are opening grade 8 class next year 2015 . This will enable us open grade 10 class in 2016 as per school strategic plan. All this demands for more classrooms . Please , you are our shield , don't be tired with infrastructural support to Maxanaedi school.

It is also important to inform you that our Zambian curriculum has changed into two systems : academic and vocational curriculum : and two classes have been introduced in schools . Reception class for 3 to 4 years children and Nursery class for 5 to 6 years children . We supposed to open these classes last January this year but we failed due to inadequacy classrooms . We really need your support items of classroom infrastructure .

Our school is currently lacking teaching materials (New Curriculum text books) and equipments (computers and other electrical machinery for vocational curriculum) . In any possible way extends your support especially in vocational equipments (Computers, wood, metal and needle work machinery).

Conclusively for all the support, building us a beautiful school, fast growing school, allow me to say THANK YOU. Please continue supporting our orphans and vulnerable children with infrastructure in order to upgrade our local education standard . I promise you, we shall take care and protect everything you have done and you will do for us. I thank you all and God bless you.
